PO Box No.		
Department		
College		

Fiscal Contact Person for your Department

Name: _____ Phone: _____

Important!

1. All Principal Investigators from the University of Florida are expected to establish a People Soft Requisition prior to our service. Questions? contact Sandy Gibbons, 273-8027, sandy@biotech.ufl.edu.
2. If you have a deadline to meet (e.g. conference, grant application), plan ahead and let us know the deadline.
3. For all imaging projects, contact the EM manager (Karen Kelley, 352-392-1184, klk@biotech.ufl.edu).
4. We group our samples for processing. Arrange your sample preparation and transport to us per staff instructions.

Please give us description of your project and tell us about the types of electron microscopy technique/service that you want. For microscopy/service options, check the web page at <http://www.biotech.ufl.edu/servicefees.html#electronmicroscopy> or send an e-mail to bkang@ufl.edu.

Please tell us about how the samples have been processed before sent to us (for example, sample collection methods, fixation condition, post-fixation storage, and so on). It is also important to inform us anything unique about your sample.
